EXPERIENCE

DECISIVE ANALYTICS CORPORATION | MACHINE LEARNING/SOFTWARE ENGINEERING INTERN

May 2016 – Aug 2016 | Arlington, VA

- Used support vector machines to model the virality of YouTube videos to predict if a video would go viral or not. Used features such as sentiment of the video's comments.
- Implemented Latent Dirichlet allocation on the corpus of all user interactions with YouTube to build a profile of the user.
- Built out a rest service to connect the prediction algorithms to a user interface.

SOFTWARE ENGINEERING INSTITUTE | SOFTWARE ENGINEERING INTERN

Jan 2016 – Present | Pittsburgh, PA

- Creating visual representations of what a robot is doing with light arrays.
- Designed a platform for children to learn to program by developing an interactive coding environment and a connected robot. Over 45 children used this platform and successfully learned basic coding principles.
- Used a corrective gradient refinement algorithm to localize a robot in a physical space. Worked on an application of CGR localization which could autonomously move the robot around in the space by clicking on a map.

CAPITAL ONE SOFTWARE ENGINEERING SUMMIT | SOFTWARE ENGINEER

May 2016 – May 2016 | Tysons Corner, VA

- One of 30+ students from 300+ applicants to be selected to attend a one week long Software Engineering Summit in Capital One's corporate headquarters.
